Art Unit: 2818

1. Claims 1-7 are presented for examination.

***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a "method for reading a nonvolatile memory with multi-level ... the fourth programming state" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
3. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1-7 are rejected under 35 U.S.C. 102(e) as anticipated by Iijima US Pub. # 2002/0118570.

Figure 6 or 15 of Iijima is directed to a method for reading a nonvolatile memory with multi-level output currents comprising applying a first reading voltage (2.5V) on a conductor (word line) of the memory cell (MC1); applying a second reading voltage (5V or 2V) on a drain ; and grounding (0V) a source (a paragraph [0014] or [0063]), thereby obtaining an output current; wherein the output current comprises a maximum output current (11 state, fig. 15), a first output current corresponding to the memory cell in the second programming state (10 state, fig. 15), a second output current corresponding to the memory cell in the third programming state (01 state, fig. 15), a third output current corresponding to the memory cell in the fourth programming state (00 state, fig. 15) (a paragraph [0120] or [0142]). Also see a paragraph [0082] for claims 3-7 and Figure 15 for claim 2.

6. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Derhacopian et al. (USP # 6215702) and Choi et al. (USP # 6097639) disclose a nonvolatile memory device with a multi-level memory cell.

7. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

8. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02 (b)).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to whose telephone number is (703) 308-4839. Other inquiries of this application should be called to (703) 308-0956 or the fax number (703) 308-7722.
